

*Design and paint a Kandinsky-style, music-inspired work of art!*

- Look back at your sketches from the previous lesson.
- On paper or in a sketchbook, draw two versions of a final design, with shapes, patterns and lines arranged differently.
- Choose a canvas or piece of paper/card no larger than 30×30 cm.
- Lightly draw your favourite design onto the canvas/paper/card.
- Use acrylic paints or poster paints to create your final piece. You might need to use larger brushes for large areas of colour, and smaller brushes for lines and details.
- When you have finished, write a few sentences to describe your piece, or your process of making it.

Make sure you're happy with your pencil-sketch design before you start painting!

- On paper or in a sketchbook, draw an alternative version of your final design, with shapes, patterns and lines arranged differently.
- Choose a canvas or piece of paper/card that is larger than your favourite design, up to 60×60 cm.
- Lightly draw your favourite design onto the canvas/paper/card.
- Use acrylics or poster paints to create your final piece. You might need to use larger brushes for large areas of colour, and smaller brushes for lines and details.
- When you have finished, write a few sentences to describe your piece, or your process of making it.

You could try mixing a little sand with some of the paint you use, to add textured areas to your final piece!

Use art software with 'layers' to arrange elements for a Kandinsky-inspired work of art.

Many art applications use 'layers'. Layers allow you to move objects in each layer around the canvas. You can resize or rotate them, overlap other layers, or change the order of the layers so that objects are arranged in front or behind others.

- Choose a photograph on which to base your design.
- Use the tools in the art software to draw simple, abstract shapes, lines and patterns to represent people, animals, places or things in the photograph.
- If your software uses layers, draw each part in a different layer, so you can move them around on the canvas.
- Try arranging the parts of your design in different ways, until you find an arrangement you are pleased with.
- You could use the tools in the art software to rotate, resize, or change the order of the layers
- Include a title for your piece, and your name. Type these in one corner.
- Save it.
- Print it!
